

Alaris Video Command Center (VCC)

The Alaris VCC provides a cost-effective means to transmit critical video from the field to leadership and stakeholders situated in mobile command centers, police HQ, emergency operations centers, etc.

ALARIS

UNMANNED SYSTEMS

- ✓ Portable solution to provide on-scene commanders with a large view of the incident if there is no mobile command vehicle available
- ✓ Video feed from sUAS is viewable on smart phones, tablets, and computers
- ✓ Compact/convenient – utilizes your current mobile WiFi (hotspot) connection
- ✓ Aviation-grade construction
 - All wires shielded and tied using military standards
 - 22-inch LED screen mirrors your sUAS display
 - Ability to display video from two sUAS simultaneously (HDMI and Wi-Fi)
 - Ability to be powered by AC or DC
 - Two USB charging ports
 - HDMI-out to provide video to Command Vehicle or larger monitor
- ✓ Rugged enclosure with integrated wheels and extendable handle

"After seeing the Alaris VCC in action, I can't imagine conducting operations without it."

– Law Enforcement Officer
