

UAS STARTUP PROGRAM

for Public Safety Organizations

Take the guesswork out of complying with requirements including: pilot certification, aircraft registration, operational procedures, data handling & privacy procedures, choosing systems best suited to your needs.

Our *UAS Startup Program* goes beyond hands-on training by helping you establish a professional, compliant, and sustainable UAS program that will withstand outside scrutiny.

"Alaris was instrumental in establishing a compliant and professional UAS program for my department. I wouldn't consider starting a UAS program without Alaris."

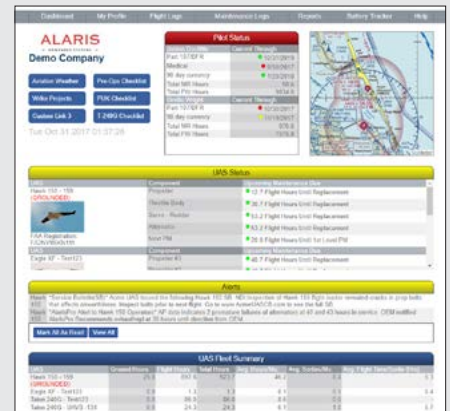

– Maryland Law Enforcement Officer

The Alaris UAS Startup Program is a turn-key solution that includes:

1. Program support — we walk you through the entire process of establishing a compliant UAS program
2. Step-by-step guidance for taking the FAA Part 107 Exam
3. Textbook, software, and training materials to help you prepare for the Exam
4. WebEx course and Question/Answer period to help you navigate the most difficult portions of the exam
5. Two days of hands-on UAS training at your site (using your equipment or ours):
 - Day one includes a full day of instruction on UAS flight operations and safety procedures for up to five students
 - Day two is a full day of in-depth "Train the Trainer" and troubleshooting instruction for 2 students
6. Assistance with selecting systems that meet your requirements
7. Assistance with registering your UAS
8. Two-year subscription to AlarisPro UAS Fleet Management software
9. Customized Alaris UAS Operations Manual including:
 - Interactive PDF version for tablets and computers
 - FAA 107 rules
 - Customized Departmental Organization
 - Customized Data Handling Procedures
 - Crew requirements
 - Flight Planning Procedures
 - Normal Procedures
 - Contingencies Procedures
 - Safety Procedures
 - Incident Checklist
 - Sample Flight Logs
 - Sample Maintenance Logs and more
 - Integrated AlarisPro software user manual
 - Important numbers and links for the airspace in your area
10. Detailed Airspace analysis of your region by our experts
11. Part 107 Day Waiver application to the FAA*

* Additional charge for airspace waiver applications

Alaris instructors have decades of experience in manned and unmanned (civil and military) aviation and public safety/law enforcement instruction. Our team of professionals is committed to helping public safety organizations establish professional UAS programs. All of our highly-skilled instructors are FAA Part 107 certified and some hold the highest certifications available for manned-aircraft as well. They have lived aviation for most of their lives and are well versed in establishing and supporting aviation organizations.
